Hiring Manager,
John Keells Information Technology (Pvt) Ltd,
Colombo, Sri Lanka

Dear Hiring Manager,

I am writing to express my interest in the **Intern – Software Development (Java) (12850)** position at **John Keells Information Technology**. I am currently a final-year BSc (Hons) Software Engineering undergraduate at the University of Kelaniya with practical experience in software development and a strong interest in backend engineering and enterprise application development.

I recently **completed my internship as a Software Engineer Intern at GIS Solutions (Pvt) Ltd**, where I contributed to the development and maintenance of national-scale systems such as the Sri Lanka Climate Action Platform. Through this experience, I strengthened my skills in software design principles, debugging, API development, and working within Agile development environments.

I have a solid foundation in **Java programming and object-oriented design principles**, along with experience in developing web applications using technologies such as **JavaScript, Node.js, React, and RESTful APIs**. I am also familiar with relational databases such as **MySQL** and version control systems like **Git**. My academic and personal projects have helped me develop scalable applications while maintaining clean and well-documented code.

I am highly motivated to further develop my skills in Java-based enterprise development and contribute to the innovative technology solutions delivered by John Keells IT. I would greatly value the opportunity to learn from your experienced engineering teams while contributing to impactful projects.

Thank you for your time and consideration. I look forward to the opportunity to discuss how my skills and enthusiasm align with your team.

Sincerely,
Minindu Abeywardena
